Creating rituals around the energy of the Moon has been an ancient tradition across cultures for millennia to help us connect with Spirit, a sense of divinity embodied by the Moon.

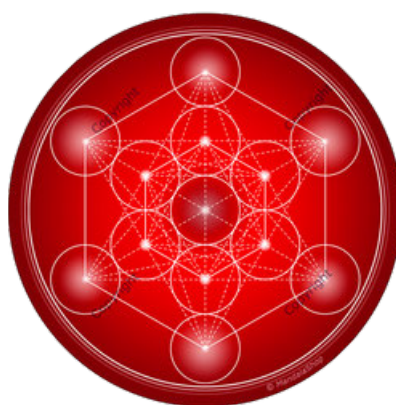

All around the world, all beings watch as the same moon lights up our night sky only to be slowly swallowed up, then miraculously begin to expand again. Each phase of the Moon describes a different energy.

We offer you different supports for moon rituals.

The Pentagram, the 5-pointed star, is a very ancient esoteric symbol. The Pentacle is a pentagram which is inscribed in a circle.

Symbol of the perfect man, the Pentagram also symbolizes the universe based on the 4 elements (fire, air, water, earth), and the fifth, the spirit. It has always been a symbol of protection.

Since ancient times, this star has been found in the main feminine cults linked to the Great Mother Goddess and in all the religions of Europe, Asia and Africa.

TRIPLE MOON GODDESS MUG

Also known as the Triple Goddess symbol, the Triple Moon symbol represents the changing phases of the moon. It is said to harmonize with the phases of femininity. It also symbolizes the natural cycles of birth, life and death.

Using the Triple Goddess symbol can be a powerful reminder throughout the day of your connection to the divine feminine and all that it represents.

Using this symbol on an altar or in a sacred space can help call on this same energy.

PLAQUE DYNAMIZING TRIQUETRA

TRIQUETRA ENERGIZING TRAY

TRIQUETRA TEALIGHT HOLDER

The Triquetra is certainly one of the most beautiful symbols representative of the Holy Trinity. The three equal arcs of the circle denote the equality of the three Persons of the Godhead. The lines run continuously and thus express their eternal existence.

They are intertwined, which expresses their unity. The center forms an equilateral triangle, itself a symbol of the Trinity. So here we have a complex expression of equality, eternity, and unity.

We print the Triquetra on different media.

Sacred geometry symbols act as talismans, amulets or good luck charms. They connect us to the great tree of life.

They help to restructure and are a reminder of the presence of the magic of the tree in each person.

The Tree of Life is a timeless symbol which has a sacred characteristic but which is also so close to us, it speaks to our soul. We offer it on different media.

The Seed of Life is formed from seven circles arranged in six-fold symmetry, forming a pattern of circles and lenses, which are a basic component of the Flower of Life design.

The first day is believed to be the creation of the sphere, the second day the creation of the vesica piscis, the third day the creation of the "tripod of life", followed by an additional sphere on each subsequent day until all seven spheres build the "seed of life".

You will find all our creations with this symbol on the store.

In Buddhism the lotus flower is emblematic of Buddha and lightness.

The symbolism of the lotus still comes from the fact that the seed and the flower appear together, it is about the simultaneity of the cause (the seed) and the effect (the flower) in the law of causality of the universe which is one of the major concepts of Buddhist philosophy.

To this we must add that the lotus draws its vital substance from the mud to flourish, in fact, above the water. Thus “the mud” represents the suffering, the troubles, the desires, which are the very soil of our development.

Positive Triskel or Negative Triskel

When the circles of the Triskelion turn to the left, in a depressional direction (senestrogatory), this will rather disperse the energy. When the circles turn to the right (dextrorotatory), anticyclonic direction, this will energize.

- The Triskelion is a very effective symbol for rebalancing our energetic state.
- Placing a positive Triskel under your foods, drinks, seeds and food supplements helps energize them.
- You can place your stones and minerals on this symbol to cleanse and recharge them.
- You can also hang a positive Triskel on the wall to reharmonize certain rooms or stick a Triskel sticker on the window.
- For use in therapy, it is a priori possible to operate on the body with the 2 polarities of the Triskel depending on the treatment to be provided: positive rotation to energize or negative rotation to disperse.

Yin-Yang has become a universal philosophical concept that many people easily adopt. It is deeply rooted in Chinese philosophy.

This symbol of Yin and Yang has, like other symbols, 2 polarities, negative and positive depending on the direction of rotation.

As a result, it can be used twofold: either to activate a process or to slow it down. This is the first process that we have chosen to develop in our vibrational articles: that is to say with the positive side forward; the face where the dark Yin of the water descends and turns clockwise.

The 6-pointed star, the Hexagram, is a very ancient symbol sometimes called the Seal of Solomon. King Solomon would have worn a hexagram as an energetic shield, a magic ring, hence the name given since that time to this powerful protective tool. It has also been called the Star or Shield of David when it is represented in a circle surrounding it (Magen David).

Symbol of balance and protection, it is complementary to the pentagram.

The hexagram represents the unity of the macrocosm as opposed to the pentagram called the sign of the microcosm.
